The screenshot shows the TLauncher 2.03 interface. The main content area displays the following information:

- Minecraft 1.10.2** (Release date: June 23, 2016)
Fixes:
 - Missing BlockEntity (Piston_Extension, ...).
- Minecraft 1.10.1** (Release date: June 22, 2016)
Fixes:
 - Farmland blocks now have a 15/16 block tall hitbox. (formerly a full block).
 - Slight player/mob offset when on Farmland Block.
 - DataWatcher / EntityMetadata ID is based on the class load order! Can cause many issues.
 - Entities from old (<= 1.5.2) worlds are killed when loaded in current versions due to a typo in the health data fixer.
 - Chat key bound to unicode char causes crash in creative inventory.
 - Structure Block - Keyboard navigation: Unable to navigate in the "structure name" field of structure blocks, using the arrow-keys, pos1, end or the delete key.
 - Ender Dragon Does not respawn.
- Minecraft 1.10** (Release date: June 8, 2016)
Blocks
 - **Structure void**
 - It is an intangible block used to indicate to the structure blocks that certain air blocks can be overridden by previously existing blocks in the destination.
 - They are invisible and have a small hitbox.
 - Allows for empty spaces in a structure.
 - **Magma block**
 - Found in the Nether, generating 4 veins per chunk between Y=27 and Y=36.
 - Crafted using four magma cream.

The sidebar on the right contains the following links:

- ▶ HOW TO PLAY?
- 📄 EN-MINECRAFT.ORG
- 🔍 HELP TLAUNCHER
- 🏠 TLAUNCHER.ORG

The bottom bar includes a search field with 'EN-MINECRAFT.ORG', a dropdown menu for 'Latest release 1.10.2', a yellow 'Enter the game' button, and icons for refresh, folder, and settings. There are also checkboxes for 'Accounts' and 'Force update'.
